

## GRASSCARPET Grass Protection

**Temporary reusable grass covering to provide clean and stable pedestrian or vehicular access.**

GRASSCARPET is a heavy-duty composite comprising a grass-protection mesh bonded to a strong non-woven geotextile. It is used to provide two functions: temporary protection or access over grassed surfaces; particularly in wet and muddy conditions:

- With the mesh laid face down on the ground and the geotextile upwards: the composite GRASSCARPET provides a clean, stable and safe surface for pedestrians, whilst protecting the grass from damage.
- With the geotextile laid face down on the ground and the mesh upwards: the composite GRASSCARPET stabilises the grass surface to resist deformation and pumping-up of mud during temporary vehicle access

The GRASSCARPET mesh is manufactured using part-recycled high density polyethylene (HDPE) and it is formulated to provide slip resistance.

GRASSCARPET composite is an ideal covering for wet and muddy grass:

- Garden parties, weddings, exhibitions and concerts
- Marquee flooring and paths
- Temporary car parks and wheelchair access routes
- Temporary pedestrian and vehicle access routes

For Fixing Pins & Pegs see page 9

### GRASSCARPET PRODUCT DETAILS

SIZE	WEIGHT	CBR PUNCTURE RESISTANCE	MATERIAL (CARPET)	MATERIAL (MESH)	PART NO.
2m x 20m	2.4kg/m <sup>2</sup>	3.3kN	Polypropylene	Part-recycled HDPE	052097
